

Four-Row Long-Life Tapered Roller Bearings

NSK four-row tapered roller bearings for rolling mills are pre-lubricated with the water-resistant grease AQGRD and offer long service life, reduced maintenance cost and increased operational efficiency. They are available as open or sealed design and in these material specification: Super TF, WTF, Sealed Clean.

Product Features

- Double lifetime compared to conventional bearings
- Available in material specification: STF, WTF
- Available as open or sealed design
- Pre-lubricated with newly developed water-resistant grease AQGRD

Benefits

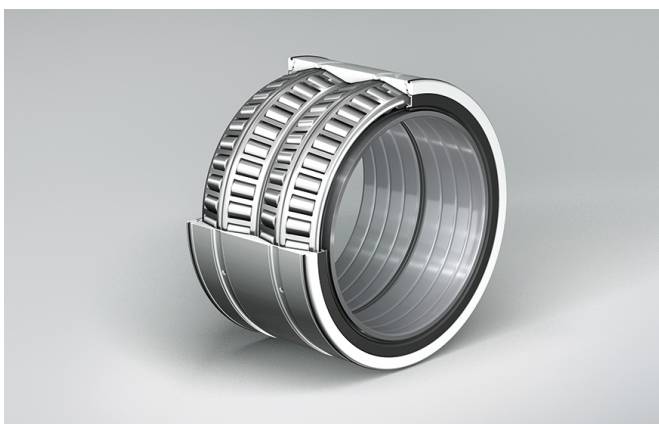

- Longer service life
- Less downtime for maintenance
- Higher operational reliability
- Reduced material and energy consumption (incl. CO2 emissions)

Condition Description

- Contamination
- Green environment
- High Speed
- High Temperature
- Lubrication

Industries

- Steel and Metals

STF 279 KV S 3952 RN1

Description

STF	Material
279	Bore Code
KV	Bearing Type Symbol
S	Optional Sealed Clean
