

L-PPS Cage Angular Contact Ball Bearings for Screw Compressors

These bearings include the L-PPS cage, which offer superior heat and wear resistance, high strength and chemical stability. This cage material, combined with an optimal internal design will provide a longer life to your screw compressors, helping to reduce unplanned maintenance and costly downtimes.

Product Features

- L-PPS cage
- Optimised internal design
- Rolling elements guided cage

Benefits

- Better resistance of the cage against heat and wear
- Good chemical stability of the cage even if exposed to oil, refrigerants or ammonia gas
- Increased load capacity due to an optimised internal design
- Improved lubricant flow
- Increased axial load limit

Condition Description

- Arduous Environments
- High Load
- High Temperature
- Lubrication

Industries

- Chemical and Pharmaceutical
- Industrial Pumps and Compressors
- Petrochemical

7310 B EA T7 SU CNB

Description

7310	Bearing Series and Bore Number
B	Contact Angle (B: 40°)
EA	High Load Capacity
T7	L-PPS cage
SU	Arrangement (SU: Single Universal)
CNB	Preload (CNB: Standard axial clearance or GA: Light preload)
