

Ball Screw Drives for Press Applications

Injection molding machinery driven by the electric servo is progressing to produce highly accurate plastic products and machinery components that must withstand hostile environments and operate with exceptional reliability. NSK's high-load Ball Screws are essential for every drive mechanism.

Product Features

- Higher speed
- High capacity load
- Low noise

Benefits

- Environmentally friendly use
- Minimised grease loss
- Prolonging Maintenance Intervals
- Total cost ownership reduced

Condition Description

- High Load
- High Speed
- Low Noise

Industries

- Machine Tools
