

## Compact FA Series Ball Screws

Compact FA ball screws are next-generation standard stock series of BSS Series high-speed, low-noise Ball Screws and offer quiet, high-speed operating performance. The ball screw shaft ends are machined with the right configuration for the NSK support units.

### Product Features

- Compact design (Outer diameter of the ball nut is reduced by up to 30% compared with NSK's conventional products)
- Low noise
- High speed
- Innovative contact seal minimizes grease dispersion and helps maintain clean work environments
- Can be used with support units, enabling low-profile design

### Benefits

- Noise level of ball screws has been reduced by 6 dB, nearly half of the level that can be sensed by the human ear
- Offers 1.6x faster permissible rotational speed than conventional models
- Quick delivery, standard product

### Condition Description

- Contamination
- High Speed
- Low Noise
- Vibration

### Industries

- Material Handling
- Medical and Health Care
- Semiconductor
- Machine Tools
