

Creep-Free Bearings Series

NSK's Creep-Free Bearings offer easy assemble and the possibility of reusable housings. Tensioned O-rings mounted in the bearing outer ring improve creep prevention under rotating loads. They are indispensable for a wide range of equipment, particularly electric motors.

Product Features

- Nitrile rubber O rings
- Ester Oil compatible
- Standard bearing sizes
- For use with loose housing fit
- Operating temperature -30°C to 120°C

Benefits

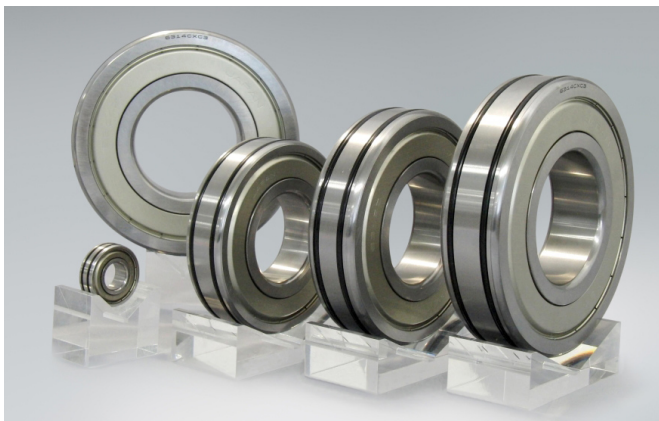

- Improved creep prevention
- Reusable housing – no reworking necessary in replacement
- Easy assembly & bearing replacement
- Reduced costs

Condition Description

- Fitting
- High Load

Industries

- Domestic Appliances
- Electric Motors
- Industrial Pumps and Compressors
- Petrochemical
- Power Tools

6203 CX ZZ C3 NS7S

Description

6203	Bearing type and series / Bore diameter
CX	Creep-Free Bearing with O-Ring
ZZ	Shields on both sides
C3	Radial Internal Clearance
NS7S	Grease type / Grease quantity
